

Update on workgroups

New GCSE Mathematics from Sept 2015

This workgroup is looking at the implications of teaching the new GCSE specifications from September 2015 and the new changes to foundation and higher schemes of work. The workgroup will be looking at sharing current thinking about the changes, possible resources, possible changes to teaching and assessments.

We are looking at running these groups at various locations around the region and would like emails from schools who are interested in running these groups and also leading on them (some funding is available).

Please email drowley@kesgrave.suffolk.sch.uk if you are interested in attending or running these groups.

New Primary Mathematics Curriculum

With the changes within the Primary Mathematics curriculum we are looking at running a workgroup looking at the following:

- New topics within the curriculum and their implications (an example being the new algebraic content)
- The mastery element of the new curriculum
- Life without levels – assessment in the new curriculum

We are also interested in contacting any MAST teachers within the region to work with.

We are looking at running these groups at various locations around the region and would like emails from schools who are interested in running these groups and also leading on them (some funding is available).

Please email drowley@kesgrave.suffolk.sch.uk if you are interested in attending or running this workgroup

Moving on all students within Mathematics

This workgroup is interested in ensuring that all students succeed within Mathematics lessons and how we can develop our teaching and curriculum to ensure that this happens

- Development of curriculum
- Teaching of least able students within Mathematics
- Mastery approach and Growth Mindset

We are looking at running these groups at various locations around the region and would like emails from schools who are interested in running these groups and also leading on them (some funding is available).

Please email drowley@kesgrave.suffolk.sch.uk if you are interested in attending or running this workgroup
